

WICONA®

Aluminium in Architecture

WICONA® Unisys

**Concentration
to the max**

The identical basis for different features: WICONA® Unisys

**Profiles with system – systems with a profile.
WICONA® Unisys.**

The WICTEC 50 basic version already fulfils all project-specific requirements, such as fire protection, burglar resistance, bullet resistance and integrated pressure profiles. In brief – WICONA facade systems function like building blocks. WICONA systems are also "unisys".

But what does "WICONA® Unisys" mean?

"Unisys" means the realisation of extremely creative ideas with a few optimally matched individual parts.

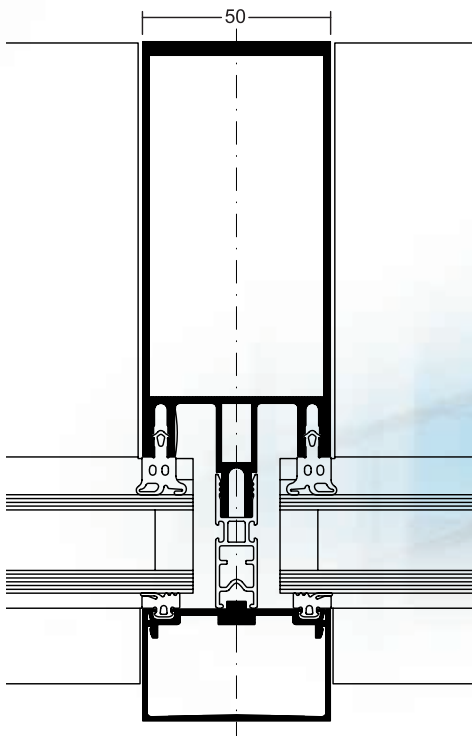

What are the benefits of WICONA® Unisys?

- Time saving
- Quality improvement
- Cost reduction

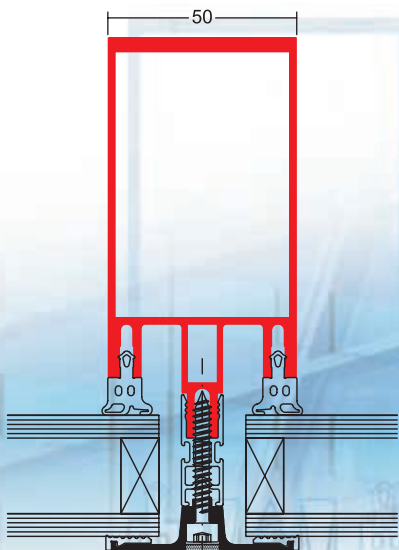

WICONA® Unisys

Concentrated and powerful

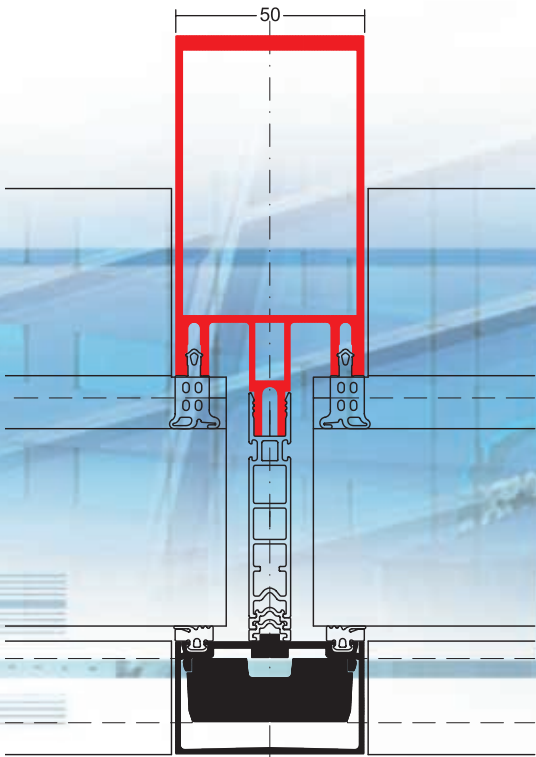

WICTEC® 50

Standard

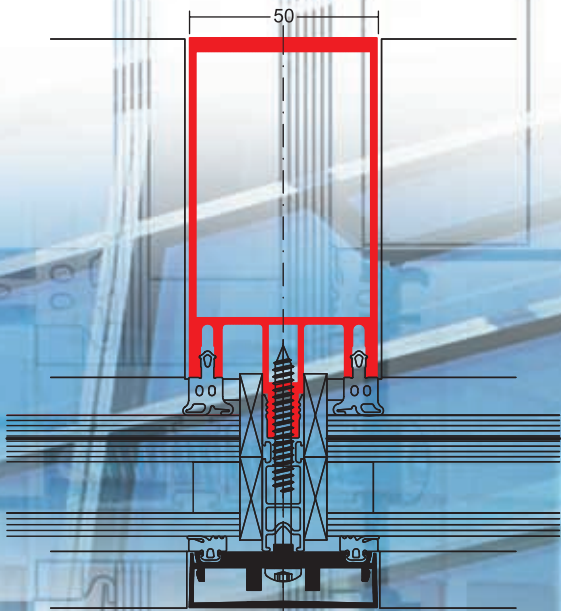

WICTEC® 50

Integrated pressure profiles

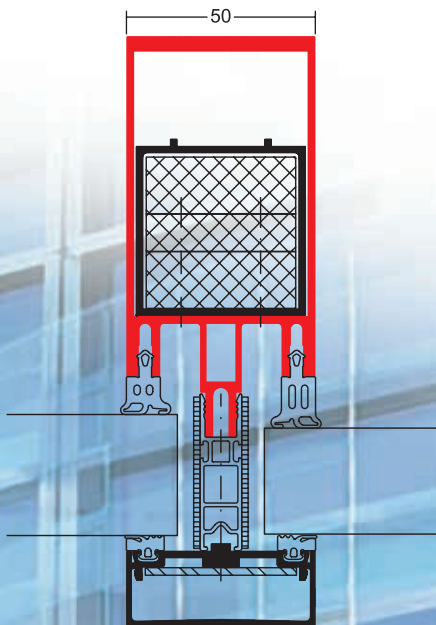

WICTEC® 50 DH

Bullet resistance

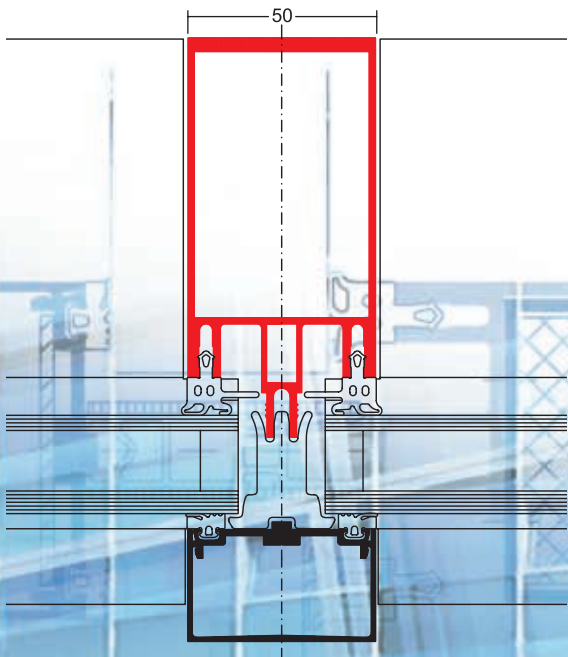

WICTEC® 50 EH

Burglar resistance

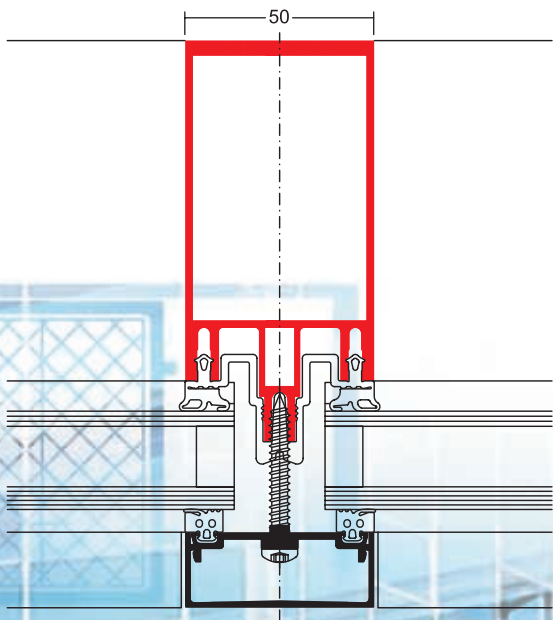

WICTEC® 50 FP

Fire protection

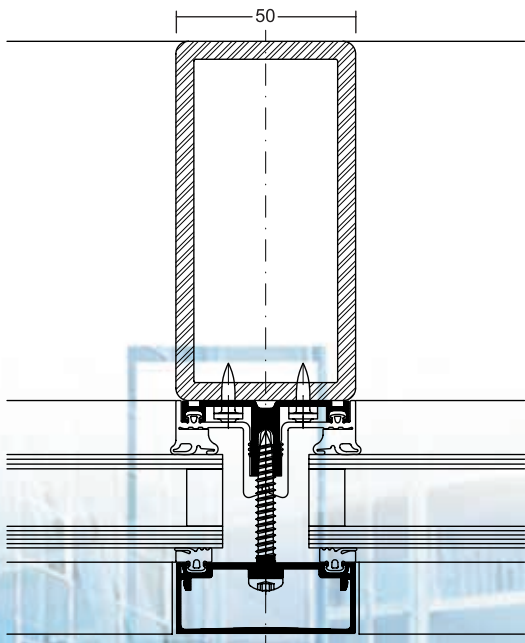

WICTEC® 50HI

High thermal insulation

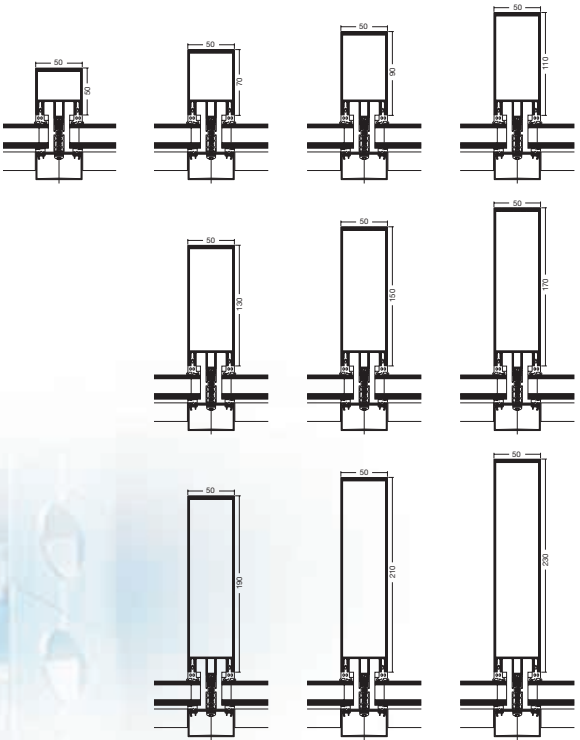

WICTEC® 50 E

Mullions and transoms
same geometry

WICTEC® 50 A

Supplementary element

10 construction depths as standard – the right one for each requirement.
